

QGuard

CREATE A MOVING TARGET DEFENSE WITH PRIVILEGED ACCESS MANAGEMENT

As attackers continue to use compromised credentials to access privileged administrator accounts, businesses need a solution to secure their privileged accounts and customer identities, and automate the visibility and management of these identity-based attack surfaces.

QGuard enables Managed Service Providers and help desks to create a Moving Target Defense with automated password rotations, privileged account discovery, and documentation.

With QGuard, service delivery managers and technician team leaders can proactively fill critical security gaps in client IT infrastructure to deter threats like ransomware attacks, key logging malware, brute force, credential stuffing and password spraying attacks.

80%

of data breaches are connected to compromised privileged credentials.

Forrester, CIO's Guide to Stopping Privileged Access Abuse

KEY BENEFITS

REDUCE ATTACK SURFACES

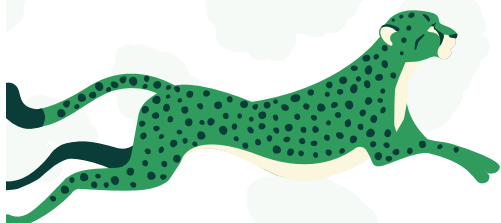

QGuard makes it easy for MSPs to align with security best practices using automations to set a recurring privileged credential rotation cadence.

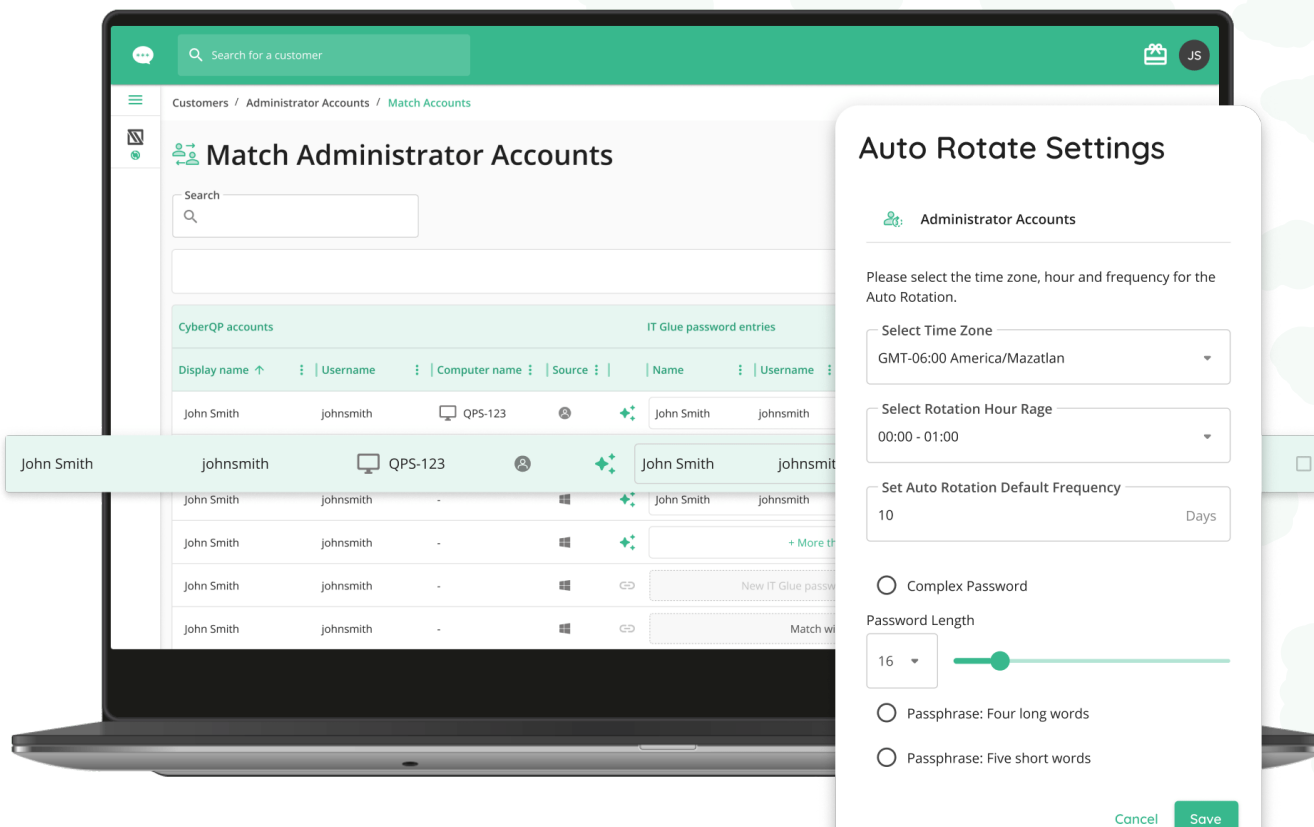

ACHIEVE PROACTIVE VISIBILITY

QGuard gives MSPs one dashboard to manage privileged access and granular visibility into different types of privileged access across customer environments. Technicians can also automatically discover unseen privileged accounts and bring them into compliance.

AUGMENT TECHNICIAN EFFICIENCY

Techs can use automated logging and alerting on privileged account activities and access a full inventory of privileged accounts of all directory sources, from one convenient dashboard.

Consolidate Privileged Access Management Into **One Platform.**

CyberQP gives technicians one dashboard to manage your privileged accounts and immediately mitigate risks involved with compromised admin credentials with daily automated rotations.

Integrate Identity Security Seamlessly with Your MSP's Tool Stack

Monitor Privileged Accounts and Get Alerts That Matter to You

Secure Credentials in a Vault Purpose-Built for Technicians
